Total 2009 Charitable Impact to Our Communities (at cost)*
\$21,602,228

2009 calculations based on the Internal Revenue Services 990 Schedule H
* Estimated 2009 Figure

Provena United Samaritans Medical Center (PUSMC) exemplifies excellence in patient care for the greater Danville area. We are a 174-bed comprehensive medical center, with a medical staff of more than 100 physicians, serving the area since 1882. We offer many inpatient and outpatient services, including emergency medicine, women's services, oncology, surgical services, diagnostic imaging, and more.

2009 KEY MINISTRY ACCOMPLISHMENTS

- Provena Health was named one of the top 50 U.S. health systems based on hospital clinical quality and efficiency, according to a study released by Thomson Reuters.

- PUSMC was rated "5 Star" for the quality of heart attack care from HealthGrades®, based on the 12th annual Hospital Quality in America study, released at the end of 2009, which analyzes patient outcomes at virtually all of the nation's hospitals.

- Our new Women's Health Center offers an upscale, modern, comfortable, private environment for women's diagnostics. The Center houses our comprehensive breast care program, as well as two new state-of-the-art ultrasound machines, and a new bone densitometry system.
- In partnership with Dr. B. Patel, our Cardiac Catheterization Lab now offers a new procedure to treat peripheral artery disease. This minimally-invasive treatment (elective percutaneous transluminal angioplasty and stent placement) improves blood flow in diseased arteries in the lower extremities.
- A new 64-slice CT scanner was added to our Diagnostic Imaging department as part of a larger remodel initiative to be completed in early 2010.
- Construction began in 2009 on the new, expanded Provena Sleep Lab in the Provena Open MRI building. Doubling the capacity of the original lab to meet community need, the new facility opened in March 2010.
- Our Regional Cancer Center added the latest technology in computerized laser positioning and 4-dimensional (4D) image acquisition to our 16-slice CT scanner for more accurate treatment planning.
- Physician recruitment efforts in partnership with area physician groups resulted in eight new physicians joining our team in 2009.
- Health Alliance patients now have the ability to stay in Danville to receive care in all specialties that our medical staff provides, without having to leave the area due to an insurance plan. PUSMC is an in-network participant for Health Alliance, including commercial, HMO, PPO and Medicare Advantage HMO/PPO plans.
- In conjunction with the Great American Smokeout in November 2009, PUSMC became an entirely smoke and tobacco-free campus, setting an example of healthy living for our community.

- In response to a community need for better access to dental care for the underserved, our HALO Project teamed up with several other agencies to host "Smiling Faces Dental Days." Children received free dental screening, services, and supplies.
- The PUSMC Foundation partnered with several groups this year to raise funds for cancer treatment, support and awareness. The McDonald's "Cancer Patch" campaign, Danville Dans' "At Bat for the Cure," Danville Inferno's Breast Cancer Awareness Weekend, and the annual "It's All in the Jeans" campaign raised more than \$94,700 combined.
- While fundraising efforts across the country were down, the 2009 Festival of Trees net revenue went up 8% from the previous year. This event supports outreach programs and medical center projects, and was named our community's premier special event for the ninth consecutive year.
